Dr. Helal Ahmed

# Project Overview

Transforming university-alumni relations through a unified digital networking and administrative ecosystem.

# The Challenges

## Communication Gap

Graduates often lose touch with their alma mater and fellow peers shortly after graduation, leading to a loss of valuable professional networks.

## Data Fragmentation

Alumni records are often scattered across manual systems or disconnected social media groups, making it difficult for the university to track success.

## Request Delays

Traditional methods for requesting official documents and certificates are slow, tedious, and require physical presence on campus.

## Missed Opportunities

Fresh graduates struggle to find credible career guidance and professional job openings specifically tailored to their faculty's expertise.

# Key Objectives

## Networking

Foster a strong, verified graduate community for continuous knowledge sharing, professional collaboration, and mentorship.

## Career Growth

Provide an integrated, targeted job board linking alumni, corporate recruiting partners, and fresh graduates under one roof.

## Digitization

Automate administrative tasks, enabling secure online document requests, modern approval flows, and digital graduation IDs.

# Alumni Experience

- ✓ **Smart Profiles:** Highlight graduation data, post-grad achievements, and professional skills in verified profiles.
- ✓ **Social Feed:** Exchange knowledge, post career updates, like, comment, and communicate in real-time.
- ✓ **Dedicated Communities:** Join tailored channels organized by graduation year, specific specialization, or industry.
- ✓ **Verified Digital ID:** Leverage a unique, QR-enabled university-verified card acting as physical graduation identity.

# Administrative Power

The Centralized Admin Dashboard delivers total governing visibility over the entire platform, ensuring data safety and request compliance.

-  **Platform Analytics:** Monitor active user metrics, registration curves, and employment success ratios.
-  **Account Verification:** Cross-check newly registered graduates against official academic records.
-  **Document Approvals:** Securely process official transcript requests and certificate prints seamlessly.

# System Workflow

## 1. Registration

New graduates sign up using their official university credentials.

## 2. Verification

Admin verifies information against FCAI student database records.

## 3. Interaction

Alumni gain full access to feeds, messaging, and exclusive job opportunities.

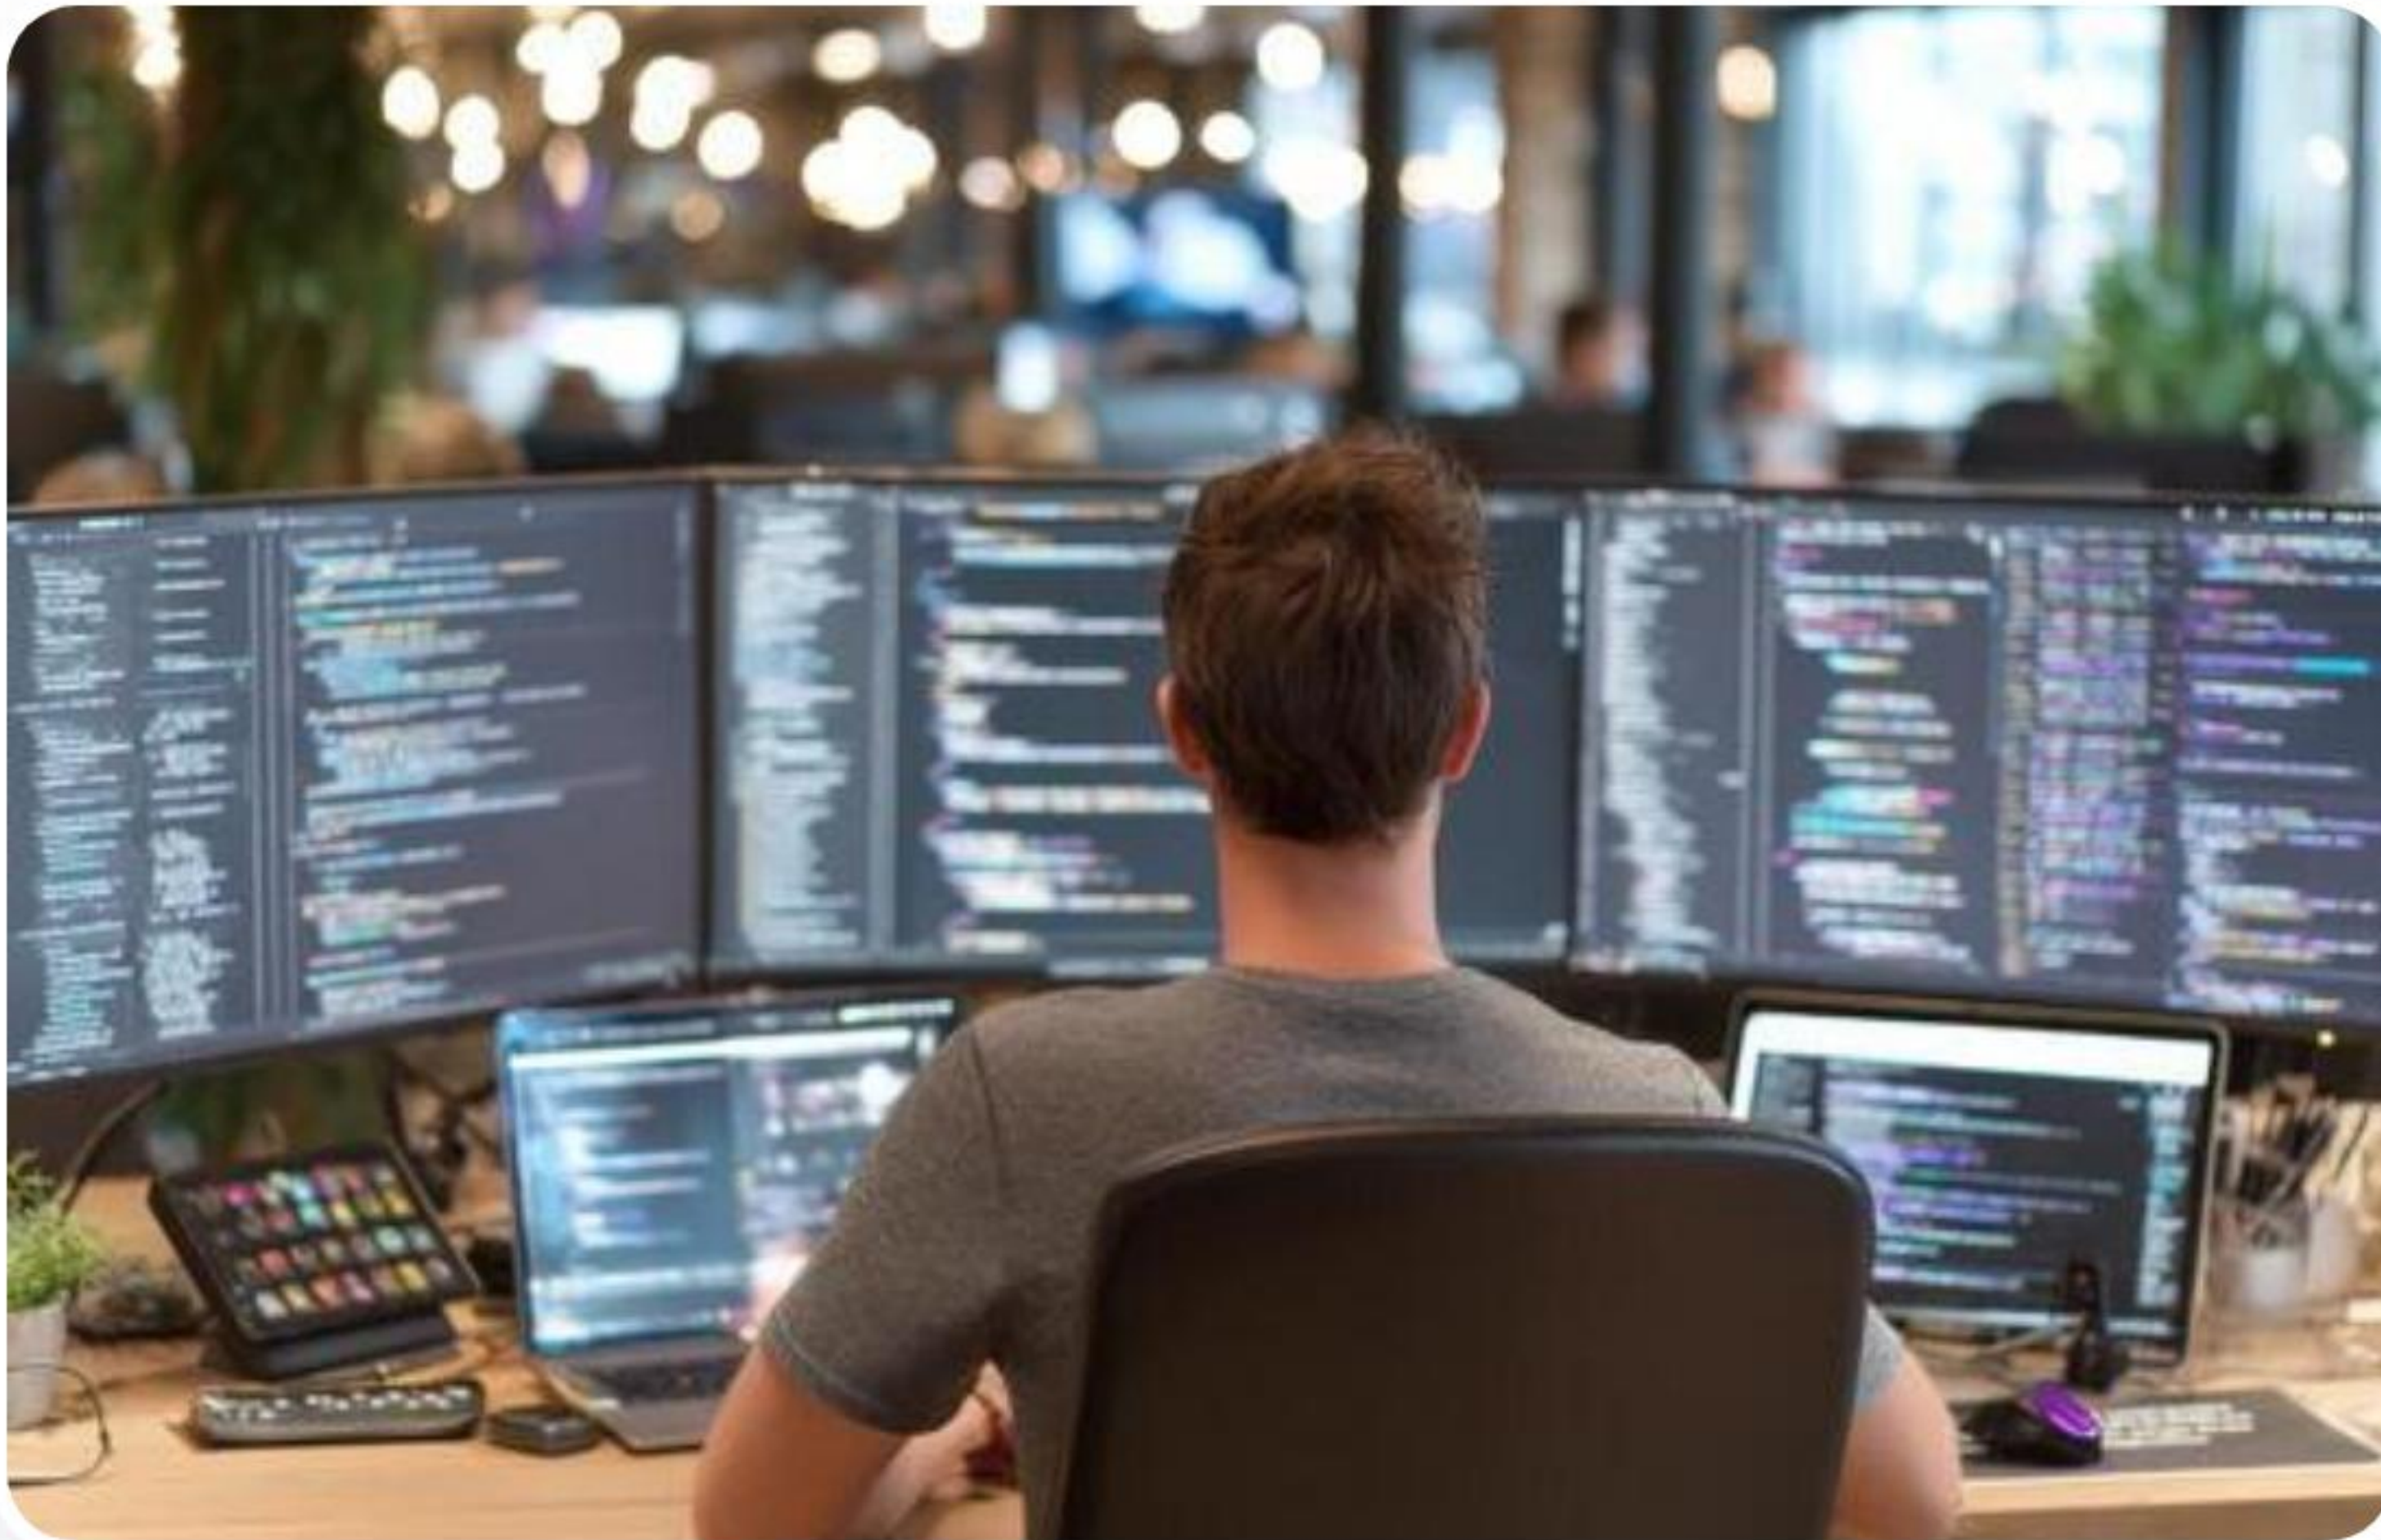

## 4. Services

Users order verified paperwork or export digital student profiles.

# Roles & Access Control

| Ecosystem Features                 | Alumni (Graduates) | Staff / Department | Super Admin |
|------------------------------------|--------------------|--------------------|-------------|
| Post Articles & Job Ads            | ✓                  | ✓                  | ✓           |
| Request University Documentation   | ✓                  | ✗                  | ✗           |
| Approve Requests & Verify Profiles | ✗                  | ✓                  | ✓           |
| Configure System Modules & DB Keys | ✗                  | ✗                  | ✓           |

# Technology Stack

**Frontend:** React.js, Tailwind CSS, & Redux Toolkit

**Backend Services:** Node.js / Express.js (or ASP.NET Core)

**Database Layers:** SQL Server / PostgreSQL (Relational Integrity)

**Real-time Networking:** WebSockets / SignalR for chat & push updates

## Expected Impact

**100%**

Digital Service Automation & Paperless Flow

**85%**

Reduction in Document Request Turnaround Time

**3x**

Increase in Active Alumni-to-Student Career Support

# Conclusion

The Alumni Portal serves as vital digital infrastructure for Capital University. It bridges the gap between graduating years and ongoing professional success while successfully modernizing administrative tasks through standard Software Engineering practices.

**Future Scope: AI-driven vacancy matching & Native Mobile Apps.**

# Thank You!
